

The Daily Enterprise.

MORT L. HIXLER, Editor.
10 cents.....Per Week.
40 cents.....Per Month.

It now appears that the Boer war is not over by several Kops.

Secretary Shepherd of the Chamber of Commerce, has some good things on tap which cannot be mentioned now. If they are not secured it will not be his fault.

Send in your ballots for your favorite teacher and work to build that cottage at Boulder.

About twenty towns in the state are working to build a cottage at Boulder. We must not let Beaumont be outclassed in the race.

The Daily Enterprise is indifferent about what teachers go to Boulder, but it is very much interested in seeing a cottage built.

Are you in favor of a cleaner Beaumont? If you are, raise your voice for drainage. That will do as much to make Beaumont prosperous as anything we know of.

It is said that certain prominent Democrats are very anxious as to who shall be Mr. Bryan's running mate. No doubt there are some prominent populists who are losing sleep on the same subject.

Fourteen thousand people have engaged passage from Pacific coast ports for Cape Nome, Alaska, on the first fleet of steamers, which sails about May 1. It is stated that forty-two steamers will leave for Nome from San Francisco, Puget Sound ports and Portland practically at the same time. Many of these steamers will make two trips, and it is estimated that upward of 20,000 people will leave Pacific ports for the new gold fields during the season.

Some wealthy sportsmen of Bridgeport, Conn., have sent to Kansas for sixty dozen quail. As soon as the birds arrive they will be taken out in batches and liberated at various points in the surrounding country. They cost \$4 a dozen and it is expected that when liberated they will be easily able to maintain themselves. Quails mate in April and May. Each pair will produce two broods of ten or twelve each during the summer and early fall. The Birdpeople men think that about 65 per cent of the young will survive, so that in the fall there will be about 5,000 quail to kill when the law is off.

The quarantine department of the United States has asked for an extra \$200,000, to be expended, to prevent a spread of the bubonic plague and to keep yellow fever from our shores. This is a significant warning to the cities of the south, especially those which have been and still continue to be careless of their sanitary conditions, as fifth breeds disease and makes such epidemics as yellow fever and bubonic plague ten times worse. It is said that the plague has already appeared in San Francisco, and if that be the case the cities along the Southern Pacific should at once redouble their efforts to improve their sanitary conditions so as to be as immune as possible. Should Beaumont ever suffer from an epidemic, due to bad drainage, the citizens would deem no expense too burdensome in order to avoid a repetition.

Mr. R. J. Leupold, consul in Baltimore for the Argentine republic, has received copies of the Buenos Ayres Standard of January 29 and February 5 which devote considerable space to accounts of the terrible heat prevailing there. February 3 the thermometer reached the appalling height of 122 degrees. There were 162 cases of sun stroke in Buenos Ayres and ninety-three proved fatal. Such terrible heat was never known there before. The bubonic plague had gotten a hold in Rosario and was causing a great deal of uneasiness. Considerable space in the issue is given up to a discussion of the country's financial condition. Being the paper of the English people in the Argentine republic, war news from the Transvaal is given fully. There is an account of a reception given by resident Americans to Rear Admiral Schley on January 24, when a handsome album was presented to him.

IMPORTANT NOTICE.

No one except the undersigned has any authority, to collect any accounts, make any contracts, or transact any business of any character whatever, in connection with the Interstate Lumberman, without my authority in writing, dated after April 1, 1900.

MORT L. HIXLER.

RICE MARKET.

Compliments of Dan Talmage's Sons & Co., New York.

With the passing of wintry conditions and an easier outlook in monetary affairs, has come marked improvement, both in the volume and character of business. The demand of the week was pretty evenly distributed among the representative sorts, covering the whole gamut, in domestic, from common to choice; also a handsome bulk in foreign, 500,000 pounds of the latter purchased in bond by the commissary department for the relief of the destitute in Porto Rico. The announcement that there will be a weekly purchase of similar amount for an indefinite period has excited lively interest among the domestic contingent in view of the accompanying intimation that with the enactment of pending legislation for the island, laying on its account in bond, will cease. This will give to the home product patronage of which it has been unlawfully deprived, a loss in the past nine months of nearly 25,000,000 pounds.

Advices from the south are of encouraging character. There is an enlarged inquiry, which closely approximates the ratio required to place the crop before the arrival of its successor. Most of the millers are at the end of their run and have closed for the season.

In detail—Along the Atlantic coast there is marked independence, almost indifference in the matter of marketing. The general feeling is that Carolina has the call on white goods, and with four months to harvest; actually five or six, before new crop can be received in competition quantity, present holdings are assured of easy disposition at steadily appreciating values.

In the southwest there has been quite a deal of speculation of late, which some deplore, oblivious of the fact that it has given weaker holders an opportunity of selling out; their places filled by others who possess capital and confidence. Recent operations have unified prices, a great gain for all concerned.

The wide disparity of values on the same grades, throughout most of the season, has tended more than any other one thing, to discourage liberal operations on the part of the trade. What inducement for a merchant to venture, when his neighbor, perchance, might purchase coincidentally on better terms.

The forward supply in Louisiana is just now a subject of lively discussion, estimates varying widely, but all in that locality are agreed that the outlook gives promise of a phenomenal forward demand. It is anticipated that in addition to the usual trade of the United States, the charitable and commercial requirements of Porto Rico will call for at least 10,000 packets weekly; the Pacific coast a similar or probably larger amount; the aggregate of the regular and exceptional demand equal to, if not exceeding any forthcoming supply.

Chiles, and correspondence from abroad note marked falling away in the outward movement from India; total shortage since January 1, to date of report; arrived in Europe, about and in course of shipment, 96,000 tons, an amount in excess of the total product of the United States last year.

With restricted supply, prices are firm and the tendency upward. Talmage, New Orleans, telegraphs Louisiana crop movement to date: Sales, 221,615 bbls; last year, 164,823 bbls.

Receipts, rough, 882,130 sacks; last year, 680,949 sacks. Market strong; sales over double corresponding week last year. Talmage, Charleston, telegraphs Carolina crop movement to date: Receipts, 48,280 bbls; sales, 46,965 bbls.

Market steady; good demand.

Bishop W. D. Walker of the Protestant Episcopal Diocese of Western New York has addressed a pastoral letter to the wardens and vestrymen of the parishes in his diocese in behalf of an unpaid clergy. The bishop in his letter praises the ardor, loyalty and devotion of the clergy in that diocese and says that the salary of the clergyman is many a place of labor in the diocese is wholly inadequate. "Many," he writes, "are inadequately provided for in this and other dioceses in material concerns. I avoid the other day that the average salary of the clergy of this church of some in these United States is only \$700 a year. I think it will be recognized that I am not pleading for charity. I am simply aiming to present a motive which has common sense and simple justice as its argument."

AT COST.

Having decided to retire from the cracker business I offer my entire stock of imported decorated wares at cost.

J. J. Solinsky.

JOHN H. KIRBY TALKS.

New York, April 2.—President Jno. H. Kirby of the Kay See, who was over from Boston for a few hours, was questioned about the status of the status of the Gulf and Interstate, the sale of which was reported as having been made by L. P. Featherstone Saturday. President Kirby said: "I bought the interest of A. H. Pierce in the property. That interest covers a majority of the stock and certain notes to secure which the majority stock and seven eighths of all the bonds were pledged as security. The minority shareholders had the right by contract with Mr. Pierce to sell the stock and bonds and retire these notes—this they have not done, and the time within which the right to do so has expired."

Asked concerning his own plan regarding the property, he said: "I shall at once put the road on a firm financial footing. I have greatly improved it physically during the past few months, work made necessary to enable it to handle economically the large tonnage which my own road, the Gulf, Beaumont and Kansas City, has been giving to it at Beaumont."

Mr. Kirby expects to return to Texas in a short while, when further developments as to the Gulf and Interstate will take place. Mr. Featherstone left for Galveston tonight. He says he does not anticipate any complication in perfecting the sale of the road reported Saturday.—Galveston News.

GEO. ALLEN IVES.

George Allen Ives, the only son of Mr. and Mrs. W. A. Ives, died this morning after an illness of about ten days. The primary cause of his death was a malady that he had suffered from periodically since he was six years old. It was an ear trouble that finally attacked the brain. About ten days ago he was taken with the grip and his condition at once became critical. For the last two days no hope was entertained for his recovery and death came this morning. George Allen Ives was born in Matagorda, Tex., and was 20 years, 4 months and 17 days old; was the only son, with four sisters, who survive him. He had resided in Beaumont since childhood, and there was no young man in the city who had more friends, or whose death would cause more widespread regret, in business matters, the writer knew him best and he was always courteous and gentlemanly. Words are inadequate to express anything which would comfort the grief-stricken family, and we can only, with all who knew him, mourn his untimely death. The funeral will occur from the family residence, 254 Forsythe street tomorrow at 10 o'clock.

THE TYRANT CUPID.

Say what you will, Cupid is somewhat of a tyrant after all. He waves his lash of government over the head of every woman who selects him to rule her life. No woman can choose the happiness and honor of widowhood and motherhood without being subject also to his pains and penalties.

But no woman ought to suffer as most do from those ailments and weaknesses which are due to her peculiarly delicate and susceptible organism. Every woman ought to know that Dr. Pierce's Favorite Prescription will cure these unnatural and debilitating troubles. It cures them absolutely, completely, permanently. It contains no alcohol to create a craving for stimulants.

It is with heartfelt gratitude that I must tell you what your medicine has done for me," writes Mrs. A. F. C. of Fennell, Meador Co., Fla. in a letter to Dr. R. V. Pierce of Buffalo, N. Y. "After consulting you about my case I took your medicine and it cured me of my troubles. I was all run down; I suffered with sick headache, pains in the back and bearing down pains. I took two bottles of Dr. Pierce's Favorite Prescription and was then able to take care of my home. My health is better than it has been for three years. I do not know how to thank you for the kind advice you gave me."

This grand "Prescription" has accomplished the same beneficent purpose for thousands of women in every corner of this broad land. It imparts health, strength and endurance in the special organism of womanhood and gives tonic vitality to the entire nervous system. Its marvelous properties are more fully described in one chapter of the People's Common Sense Medical Adviser by R. V. Pierce, M. D., a splendid thousand-page illustrated volume which will be sent free paper-bound for 21 one-cent stamps to pay the cost of mailing only; or cloth-bound for 31 stamps.
